## Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Species of the embodiment disclosed on page 11, lines 11-23, page 12, lines 1-7. In particular, the species that compensates for <u>image misregistration of a toner particle stack</u> that involves: <u>transferring a first toner particles onto the belt from a print station as a function of a first position signal detected by a sensor and transferring a second toner particles onto the belt from a print station as a function of a second position signal detected by a sensor.</u>
- II. Species of the embodiment disclosed on page 13, lines 6-17. In particular, the species that <u>compensates for non-uniform photoreceptor motion</u> that involves: <u>generating a timing signal representative of the photoreceptor motion, whereby the actuation of individual groups of the diode array is synchronized with the motion of the photoreceptor.</u>
- III. Species of the embodiment disclosed on fig. 5. In particular, the species that compensating for image misregistration of pixel produced by a light source onto photoconductor belt, that pixel having an <u>uncompensated pixel position that is out of alignment with an ideal pixel position</u> that involves: <u>determining the image misregistration as a distance between the ideal pixel position and the uncompensated pixel position</u>; and matching the uncompensated pixel position to the ideal pixel position.
- IIII. The species of fig. 1. In particular, an imaging system that does not include any functional steps for any of the method: 1) the method that compensates for image

misregistration of a toner particle stack; 2) the method that compensates for non-uniform photoreceptor motion; and 3) the method that compensates for image misregistration of pixel produced by a light source onto photoconductor belt.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to King Y. Poon whose telephone number is 571-272-7440. The examiner can normally be reached on Mon-Fri 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Coles can be reached on 571-272-7402. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
